

Release Notes

These Release Notes outline changes made to Panviva (version **18.3**) that may directly affect users.

Customer Requested Enhancements

[Ability to split content with the click of a button \(19007\)](#)

A new editor feature that enables the Author to be able to split huge content into smaller tasks or sections, with just a click of the button. To split the content, you can place the cursor on the given paragraph and click the 'splitter', which will move everything from the beginning of that paragraph and everything below the cursor to the new task (or section).

[Multi-select of Mass-archive messages \(19805, 17549\)](#)

This improvement enables the user to be able to either multi-select or archive all the messages in the message centre. When selecting the drop-down from the check-box –

- 'Archive all' option will always be enabled.
- 'Archive selected' will be enabled when a selection is made
- If the main Check-box is selected, all the messages in the given page will be selected

Improvements

[Performance Improvements \(19614\)](#)

Technical changes have been made to improve the operations involving large operations like search, Analytics, and background tasks.

[Document Access details chart now also includes sub-folders of the selected folder \(20241\)](#)

Document Access details chart now returns result for all the documents and sub-folders present within the selected folder. Please note that selection of home folder for this chart is disabled. *Document access detail chart supports selection of one folder to run the chart*

[Improvements to the top 10 documents, search terms and User charts \(18636\)](#)

We now have the option to be able to generate results for up to 100 Number of records for the charts – Top Document, Top Search terms, and Top users. The drop-down filter allows to select between two values – 10 & 100.

Fixes

Unable to paste text with angle brackets in the document (19383)

Copying content within angled bracket would delete the content and only paste brackets in the document. This has now been corrected.

No Complete 'tick' button in compare view (19850)

A complete button to close the compare window has been reinstated.

Full data export for Document access details chart contains blank email column (19362)

The full data export for 'Document access details' chart was displaying a blank column in place of user Email. This has now been corrected (The CSV file will have blank cells in case the user does not have an email listed).

Full data export for Document access details chart contains blank email column (19897)

The full data export for 'Document access details' chart was displaying a blank column in place of 'Date of Access' and shifted data to the next column. This has now been corrected.

Search results provide incorrect detail fields (19847)

The search results were displaying fields inconsistent to the configured display settings in the Admin setting. This has now been corrected.

Tasks in editor do not appear for when the number of tasks exceeds 14 (18809)

When the number of tasks created in the editor exceed 14, the tasks after did not

appear (IE browser specific issue). This has now been corrected.
