

Release Notes

These Release Notes outline changes made to Panviva (version **18.11**) that may directly affect users.

Customer Requested Enhancements

Increase notification body character limit to 500

Release and workflow notifications message body character limit has been increased from 166 to 500 characters, allowing more detailed messages to be sent to users.

Editor enhancement in loading reusable content objects

The Editor has been enhanced to handle a large number of reusable content items in a single document.

Request past version of a document using GetDocument API

GetDocument API has been enhanced to accept a new "version" parameter to allow retrieval of past versions of a Panviva document.

Fixes

Feedback document name is incorrect (18868)

The issue of incorrect document name in the case of Welcome Pages updates notifications has been fixed.

Importing a document into a Welcome page folder does not trigger Welcome Page Notifications (20648)

When importing a document into the welcome page folder, a notification stating "Welcome folder change" will be sent to all relevant users.

Inactive Users: Role filter with anybody is not returning any results (21138)

Inactive Users Analytics report was not displaying results when "Anybody" selected in the Role filter. This issue has now been fixed.
