

PANVIVA

Release Notes

These Release Notes outline changes made to Panviva (version **19.08**) that may directly affect users.

Features

‘Saved Filter’ feature to save analytics filters (3244)

The new ‘**Saved Filter**’ feature allows a user to save filter criteria for Analytics charts. Saved filters retain the filter configuration for later use. This is time saving for analytics reports that are run often with the same filter criteria.

Users can also rename, modify or delete an existing saved filter to adjust or update it as required.

Please note: Saved filters are user and chart specific.

Improvements

Faster retrieval of feedback list in Manager View (6613)*

Users will now experience a significant speed improvement when accessing Feedback Management section in Manager View. This is most noticeable on instances with large document numbers.

Fixes

Deleted users display as blank in the Document Access Details Analytics (8554)

Document access records for deleted user accounts used to appeared as a blank ‘Username’ column in the report results grid. Now it will display “Deleted User” in the ‘Username’ column.

Timeout Error while fetching feedback list (8944)*

Some users, with a high number of documents, were experiencing an error wherein accessing feedback list in Manager view displayed zero results. This is now fixed.

Error message when accessing manual workflow on documents with no prior workflow settings (8927)

Users accessing manual workflow for documents with no prior workflow settings were displayed an invalid error message, ‘The workflow selected has no valid reviewer’. This is now fixed.

If this is you, and you love what we’re doing, or you have some product feedback, please let us know at support@panviva.com

** Applicable if the **Collaboration Hub (Advanced Feedback)** feature has been enabled for Panviva.*
