

We'd love to hear what you think about Release Notes...or even if you don't like it, so we can continue to get better!

Don't forget we're here to help! So, if something doesn't make sense reach out to our CAC Team. support@panviva.com

WE FIXED IT!

Reusable content - document location display issue (6073)

What was happening?

When viewing Reusable content 'Inserted in' relationships, the breadcrumbs displaying the document location were missing.

What do you need to do?

Nothing at all, we have fixed this in this release.

Reusable content - 'Inserted In' relationships list pagination issue (7021)

What was happening?

When viewing Reusable content 'Inserted in' relationships, the page would display the full list of documents, irrespective of the applied page limit.

What do need to do?

Nothing at all, we have fixed this in this release.

Documents don't appear or cannot be accessed from your search result (18316)

What was happening?

When searching for a document via the Viewer, in some cases the document couldn't be found despite correct permissions. When accessing that document via Folder Tree or via Go-To Document function, an error message is then displayed (You are unable to view this Document/Folder).

What do you need to do?

Nothing at all, we have fixed this in this release.

Documents lock preventing Authors from editing (17632)

What was happening?

Documents which hadn't been closed properly after editing, resulted in locked documents. This prevented users from editing the document content further. The locked documents could only be unlocked from the Admin settings.

What do need to do?

Nothing at all, we have fixed this in this release.

Using some special characters in Document external links URL result in broken links (9966)

What was happening?

External link URLs containing some special characters (such as `{}`) resulted in a broken link.

What do need to do?

Nothing at all, we have fixed this in this release.

Archived notes re-appearing in Manager (17108)

What was happening?

Archived notes in the Editor would re-appear in the preview and editor mode following a refresh.

What do need to do?

Nothing at all, we have fixed this in this release.

Tasks and text are not highlighted correctly in Document Review mode (7842)

What was happening?

Viewing inline comments wasn't highlighting the task and the content referenced while adding comments in document review.

What do need to do?

Nothing at all, we have fixed this in this release.

Notifications sent to 'Anybody' role when assigning a Scheduled Workflow (8372)

What was happening?

When assigning a Scheduled Workflow to a document, the 'CC Author' field was populated with 'Anybody' role by default. This resulted in workflow notifications being sent to all users in 'Anybody' role.

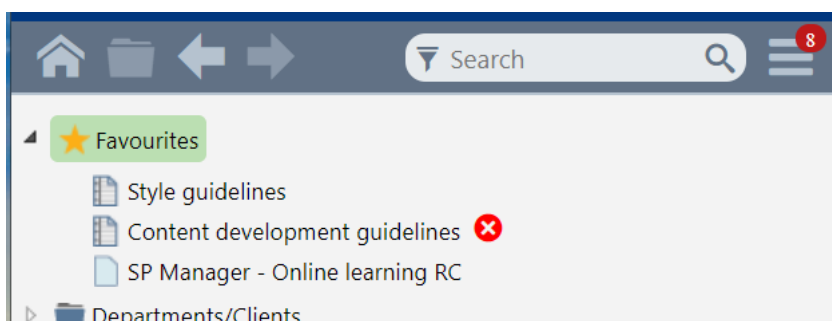

What do need to do?

Nothing at all, we have fixed this in this release.

YOU ASKED, WE LISTENED!

Remove documents from your 'favorites' list (3993)

We've introduced a quick way for you to remove documents from your 'favorites' list. Previously you had to open each document in your favorites list in order to remove it from your 'favorites' list. Now you can do that with a click of a button directly from your 'favorites' list, making it easier to manage your 'favorites' list which saves you time.
